### Crackdown on Mini-Bikes Ordered in County Areas

A crackdown on mini-bike riders traveling on public streets and highways in unincorporated areas of Madison County has been ordered by Sheriff Juan Maresas, a deputy sheriff informed the Madison Board of Auditors Sunday night.

In other business, the Board of Auditors last night voted to tax license fees of \$136,700 in general membership expenses and \$45,500 for the road fund, and approved issuance of tax anticipation warrants totaling \$10,000.

Numerous complaints and mini-bike complaints were made by Supervisor C. W. Whitnell, who commented, "People are interested in mini-bikes, along with other areas."

Whitnell said a 9-year-old boy riding a mini-bike was struck by a vehicle on Highway 11, and another boy was hit on Longoria Drive. Both incidents occurred the past week, he added.

Deputy Sheriff Sgt. Delbert Clemens said the law forbids operating a mini-bike on public roads, and he added, "As the law stands now such machines cannot be ridden as they are not equipped with headlights and lack adequate braking capacity, among other things."

Most of those found riding the bikes are to young to obtain a driver's license, even if the machine would be licensed, he noted. "The sheriff has issued an order that he wants enforcement of this law," Sgt. Clemens said.

The officer said youngsters caught riding mini-bikes on a public street or highway will be warned and their parents warned they are liable for a ticket and fine.

"A second violation will be cause to issue a citation to the parents on the charge of permitting an unauthorized person (or child) to drive."

"These bikes are not designed

to be driven on streets," the officer said. "They are trail and dangerous in normal traffic."

Widening of Nameoki Road from Granite City to Morrison Road may begin this summer, Albert Bell, highway commissioner, told the board. He said the information was provided by state highway engineers who surveyed the road with him to determine maintenance steps.

Should the widening project be delayed, Bell said, the state has a plan to route traffic to roads next fall and alternate with the township road crews in provisional repair work.

Township auditors also agreed to reimburse the Southwestern Illinois Metropolitan Area Planning Commission (SWIMAPC) a total of \$565, based on area population figures, for services in 1972-73; heard all easements have been acquired in a proposed new Dobreby Slough project.

iet; and reported township bills are now posted on the office bulletin board for public inspection.

Whitnell said Friday, May 19 is the final date Nameoki Township residents can take advantage of the free shots this spring. Dr. A. B. Douglas will provide the shots at the State Park firehouse from 6 to 8 p.m. on that date, he said.

C. W. Whitnell tags now are available from Assessor Joseph Cohen at a cost of \$3 for females and \$1 for each male. A total of 21 calls was completed by the township humane officer in the past two weeks, the supervisor said.

Blocking off an unused street near Maryville and Morrison roads was proposed as an unauthorized landfill in 1930's resolved to 2710 Iowa St. She said she and Fossie were neighbors, that his father was a postman and that he has two brothers, Fred and Louis, and a sister, Sarah.

## Brake, Stanton Perform, Warriors Win District Meet

Pitching was the key as the baseball Warriors of Granite City High School won the district championship in tennis, 1-0 victories this week at Wilson Park.

Jesse Brake hurled a three-hitter but it was touch-and-go until the last of the seventh inning when the Warriors scored on an error, eliminating Colinsville.

Collinsville's K. h. o. k.s advanced to the finale by trouncing Madison's Trojans 18-1 on Tuesday.

John Stanton matched Brake's performance with a no-hitter in the district opener against Ed-wardsville on Monday.

Granite City, 15-6 for the season, will meet Lebanon in the regional opener Monday at At-ton. Lebanon also won its own district, shutting out Assumption 3-0 yesterday.

Other Alton regional entries

are Cahokia, 9-4 winner over East St. Louis in yesterday's Cahokia district title game, and O'Fallon, 11-10 winner over Wood River in the wood River district.

The Warriors received their break yesterday in the final frame when, with one out, James Forrester reached first base on an error. He then stole second. After Jack Scarborough walked, Bill Parks hit a grounder in the infield, and an error by the second baseman ended the game.

Brake struck out four batters and walked two in gaining his fourth success in five decisions. The Warriors collected seven hits.

Equally important to the GCHS cause was the effectiveness of Stanton, who fanned nine Edwardsville Tigers and passed one.

The winning run came in the sixth when Scarborough was

safe on an infield hit and came around on a double by Parks. Coach Hale Garbe was enthusiastic on Warrior chances to a state tournament berth.

"We have been having real good pitching, some good defense play, and the players seem to be in a winning frame of mind," he waxed yesterday. "You can't ask for much better playing when you have two shutouts in district competition."

Commenting on Monday's action: "We played a very tight ball game. Our defense was excellent, and I think Steve Burdige and James Forrester did a real good job."

Collinsville broke the Trojans' hold in the first inning Tuesday by scoring 10 runs. John Henke and Carl Fonyville accounted for the two Madison hits in the game, insufficient to offset eight errors.

## Cougars Eye NCAA Bid, Take Two from MacMurray 5-1, 4-0

The Cougar baseball team at Southern Illinois University-Southern is aiming after a bid to the NCAA college division midwest regional tournament after taking a double header over MacMurray College 5-1 and 4-0 yesterday on the new baseball field.

Midwesters give the Cougars a 24-19-1 record, with nine over NCAA university division teams. The bid would be the third in a row for Coach Lee Middleton. The Cougars will be invited to five northern tier states to participate in the 10-state midwest regional meet.

Awesome batting carried SIU-SW in the first half of the season, but the Cougars pitching is coming around.

Coach Lee's pitchers were super yesterday. Dale Wilden, tanky righthander, had a brilliant four-hitter as he won, 5-1, over nine innnings, while Ron Middleton flared with a no-hitter for five frames and shut-out MacMurray, 4-0. It was Wilden's fourth victory, 16-10 with two losses.

Tom Twelmen, winning his third in less than five days, in his second shutout in the same span of time, was nearly overpowering for five innnings.

SIU-SW to Fight Non-  
Original Term Papers

Positive actions will be taken against SIU-SW students turning in term papers written by commercial firms, Vice-President and Secretary Andrew Kochman said today.

He said he need for a concerted attack on the problems that been brought about in recent months by businesses engaged solely in the commercial production of research papers for university students across the country.

Calling the rise in sales a matter of grave concern to the faculty and officers of SIU-SW, Br. Kochman said, "Higher education is diminished in value and honor and forces of professors to move college-level students beyond research toward individual academic investigations and research."

Kochman said SIU-SW is prepared to take any actions within its authority, through internal policies or external law, to protect the integrity of the academic process from diminishment by use of research papers.

MRS. DOUGLAS T. CONRAD, who took place at Sacred Heart Roman Catholic Church. She is the former Miss Karen Marie Lickenbrock, a daughter of Mr. and Mrs. Ralph F. Lickenbrock, 2416 Hodges Ave.

## Miss Karen Lickenbrock, Douglas Conrad Are Wed

The wedding of Miss Karen Marie Lickenbrock, a daughter of Mr. and Mrs. Ralph F. Lickenbrock, 2416 Hodges Ave., and Douglas T. Conrad, son of Mr. and Mrs. Thomas J. Conrad, 66 Riviera Drive, was solemnized May 6 in an afternoon ceremony at Sacred Heart Roman Catholic Church.

Mr. and Mrs. Ralph Lickenbrock presided at the organ for Richard Jones, soloist, who sang "The Lord's Prayer," "More," and "Because." The Rev. Joseph Enright performed the double ring ceremony at 2 o'clock.

Mr. Lickenbrock escorted his daughter down the white carpeted aisle and gave her in marriage. She selected a gown fashioned with an Empire belt and a lace-trimmed hem. The lace, accented with delicate floral clusters, featuring green leaves interlaced with velvet ribbon.

The sheer sleeves, extending to the wrists were cuff with a netting waist and carried a bouquet of sprays in colors to match their gowns.

The groom chose Richard J. Jones, a cousin of the bride, as his best man. Richard Lickenbrock, Ralph and Richard Lickenbrock, brothers of the bride, Jerry Chenevert and Terry Jones completed the group of groomsmen.

Mrs. Lickenbrock chose for her daughter's wedding a blue and white knit suit with matching accessories.

The groom's mother, Mrs. Conrad, had corsages of white carnations tipped in blue and pink to match their ensemble.

Miss Karen Head attended the gues book at a reception at Bethesda Baptist Church Hall following the ceremony.

Mr. and Mrs. Conrad, parents of the groom, were hosts at a reception dinner in their home Friday evening.

Both young people attended Granite City schools. The former Miss Lickenbrock is employed as a credit clerk at Edwards Department Store. Her husband is a sheet metal apprentice with R. G. Kohl Industries in Belleville.

Their attire formed a rainbow color scheme, the honor at-

## Cancer Society Starts New Service to Women

Mrs. Ray Sachleben, 430 N. Center St., Collinsville, has been named coordinator in the new "Reach to Recovery" program sponsored by the American Cancer Society. That is starting in Madison County, it is announced by Mrs. Ruth Wilderman, area executive director, Madison County Unit.

The "Reach to Recovery" program is designed especially for breast cancer patients who are in the hospital at their physician's request and the patient's approval a "Reach to Recovery" caller, who is a cured mastectomy patient herself, visits the patient and talks with her about her rehabilitation after surgery.

A special kit, prepared by volunteers of the American Cancer Society, is given to the patient with instructions on using the therapeutic contents. She is also given a temporary prosthesis of her size to wear home from the hospital and wear until such time that she can be permanently fitted.

Mrs. Sachleben is a cured mastectomy patient of 10 years. She has been trained in Chicago by the American Cancer Society for this specific work and in turn will train qualified ladies who are approved by the cancer center to be callers at St. Elizabeth Hospital and in the Highland, Wood River and Alton Hospital.

The "Reach to Recovery" program has been well accepted all over the United States and its results in helping women to adjust is tremendous, Wilderman said. "What better than to have three women-to-woman talk between those who have a common bond," she added.

Mrs. Sachleben, who is vitally interested in the program, stated, "If only a program such

as this had been in effect when I was a new mastectomy patient. However, I now feel that I can help others and that is a very good feeling."

All physicians and surgeons in the Madison County area have received letters announcing the start of "Reach to Recovery" and many of the patients are referred by their doctor will have a program caller visit them, Mrs. Sachleben noted.

Additional information may be obtained by calling the American Cancer Society, 528 Henry St., Alton, 465-7821, or Mrs. Sachleben, at 344-5173.

Other patient service-rehabilitation programs are in the planning stages, Wilderman said. She emphasized that generous donations to the annual Cancer Crusade drives has enabled such programs and services possible.

**Delay in Mobile Home Tax Plan Is Recommended**

The Illinois Department of Local Government Affairs this week recommended against imposing the privilege tax on mobile homes which again will be assessed as personal property here.

In a memorandum to officials in counties which have adopted the tax, Robert J. Lehmann, director of the department, quoted an opinion by Atty. Gen. William J. Scott that part of state legislation which authorized the tax is unconstitutional.

Lehmann recommended that mobile homes be assessed for property tax purposes in past years. Provisions relating to the regulation of mobile home parks remain in effect, he added.

Dale H. Madison County supervisor of assessors, forwarded a copy of the memorandum to township assessors with plans for assessing mobile homes, he noted.

"We have inherited the assessment of trailers again," he said.

An ordinance had been adopted by the Madison County Board of Supervisors planning a 10-cent tax on square foot to take effect on July 1, with registration of the mobile homes prior to that date.

Numerous notices have been issued to mobile home owners and funds have been collected to finance the collecting of the tax in the various townships.

The county will continue registration of mobile homes despite the recommendation.

Roger Deltour, administrator of the program, said a special registration period for owners of mobile homes in Pontoon Beach will be held on Thursday, May 18, at the Nameoki town hall, 4250 Highway 162.

Deltour emphasized that the tax plan is a law until challenged in court and that legislation has been introduced in the General Assembly to correct the questionable sections of the law.

# Illinois Per Capita Income Rise Is Faster Than Prices and Nation

By LESTER BELL  
Copley News Service

Washington — Illinoisans had a 6% increase in per capita personal income last year, enough to stay slightly ahead of the 4.25% rise in consumer prices.

Government's analysis of the state said Illinois ranked sixth nationally in per capita income in 1971 of \$4,138, up 6.6% from 1970's figure of \$3,880.

In national rankings Illinois is bracketed between Hawaii at \$4,797 in fifth place, and Alaska at \$4,749, in seventh place.

The national average for 1971 was \$4,138, up 6.6% from the \$3,920 registered in 1970.

Using the national average, Illinois' percentage of the national average per capita income in 1971 was 115%.

The Bureau of Economic Analysis, an arm within the Department of Commerce that for the purposes of its study, personal income consists mainly of wage and salary payments, proprietors' income, rent and dividends, and government transfers, less personal contributions for social insurance.

Per capita personal income is total personal income divided by total population.

Forty-one states and the District of Columbia showed increases in real per capita income while four others showed little change and five showed decreases.

The bureau divides the nation into eight regions for its analysis.

Illinois is in the Great Lakes region with Wisconsin, Michigan, Indiana and Ohio.

Per capita income and national rankings for these other four states were: Wisconsin,

\$3,880, 23rd.; Michigan, \$4,317,

12th.; Indiana, \$3,973, 21st.; and

Ohio, \$4,119, 10th.

The District of Columbia led in 1971 with a per capita income of \$6,000, an increase attributed largely to a more than 10% feed-in tax rate.

Connecticut was first among the states at \$5,032, but its 3.4% increase was among the smallest.

Mississippi per capita income was last with \$2,766, only 77% of the national average, but its 7.4% increase topped the norm.

The bureau said states with high per capita income are concentrated in the Northeast and Far West while those with low income are mainly in the Southeast.

There was an exception. Of the 11 states with 1971 per capita incomes above \$4,500, eight are in New England, the Midwest or Far West. The other three are Alaska, Hawaii and Illinois.

The income increases in the Great Lakes region came mostly from manufacturing, the bureau said. Farm income also increased faster in the Great Lakes region.

If the Russians start buying soybeans for human consumption, more credits must go to Illinois housewives who have been sending Rep. Paul Findley recipes for mouth-smacking soybeans.

The Illinois Republican made a soybean pitch in Moscow last January and the Russian interest inspired U.S. Ambassador Jacob D. Beam to tell his embassy people and Findley for a long shot.

"The world will be eating soybeans in no time," predicts Findley, commenting on the response to his search for ways to prepare blanched soybeans.

## Computers' Diversity Cited in Shrine Talk

The role of high-speed computers in such fields as highway construction, traffic control, bridge building, space travel, engineering, accounting and credit computations was cited at a Shrine King, Granite City Co. information services manager, addressed the Tri-City Shrine Club.

He traced computers to a "difference engine" developed by Charles Babbage in 1812. It dealt with logarithms and was improved in accuracy in 1822 and capacity in 1833, he related.

In 1897, Howard Aiken studied the Babbage design and, with help from the small International Business Machines, began work on the Mark I computer, completed in 1944.

Aiken noted that it solved World War II artillery direction; the first electronic computer followed in 1947, and insurance data processing began in 1953. He noted that the St.

## Scholarships for Teacher Education Go Begging

By RAY SERATE

Copley News Service  
Springfield—Even though the legislature decided to abandon the teacher education scholarship program there are still 750 scholarships available in the teacher training area.

An official in the office of State School Supt. Michael Bakalis says there are 250 scholarships available in teacher education in special education, and there are 500 teacher education scholarships available for persons who are 21 years of age or over.

The bill to abolish the program was sponsored by Sen. Thomas Hynes, D-Chicago.

However, students who had received the teacher education scholarships prior to this past Jan. 1 will hold them until they graduate. The law became effective on Jan. 1.

In effect what was regular eliminated under the law was the teacher education scholarship program that was awarded to the high school students based on high school enrollment. One scholarship was awarded for so many hundred students each year in the various high schools. It was not the regular teacher education scholarship program.

In the past it was estimated that some 9,500 such scholarships were awarded throughout Illinois to the high school students who were graduating and going to college to enroll in the teacher education programs.

### No Great Demand

College officials report there hasn't been a great demand for the teacher education programs by incoming freshmen in the last two to three years. In some areas of the state there have been signs of an oversupply of teachers.

However, officials in Bakalis' office point out there are still many scholarships available to students from the general education development scholarships, to the regular high school scholarships, to the

junior college scholarships and public aid scholarships.

There are also several other scholarship programs available. These are in addition to the many provided by the various public institutions of higher learning scattered throughout the state.

The Scholarship Commission also has broadened its program to the teacher education field. It was felt that many of the scholarship programs under the State School Supt.'s office could be incorporated under the Commission's jurisdiction.

Richard B. Oplive has pointed out that many scholarships are now available to help students through the Commission.

### Employment Survey Scheduled in Area

How many people are supplementing their regular pay checks with second jobs? How many people are enrolled in additional training? These are some of the questions being taken during the week of May 15 from a sample of households in the Quad-City area. The questions are in addition to the usual ones asked in the monthly survey on employment and unemployment conducted nationwide by the Bureau for the U. S. Department of Labor.

Results of this monthly survey provide a continuing measure of economic conditions in the Quad-City area. The survey showed that employment had increased by 620,000, bringing the total to 812 million, seasonally adjusted, the largest monthly gain since June 1967.

The overall unemployment rate was 5.9% in March, slightly higher than the 5.7% in February.

FACTS supplied by individuals participating in this voluntary survey are kept strictly confidential and results are used only to compile statistical totals.

### Car Stripped, Burned

The stolen 1969 red and black car of Chester Spencer, 896 Lee Ave., Madison, was found stripped and burned at Stump Lake, north of Granite City, by Madison County sheriff's deputies Tuesday. The car was stolen from the 1400 block of Fourth Street in Madison at 9:15 p.m. Monday.

## Suit Asks 1971 Personal Taxes Be Held in Escrow

The Illinois Agricultural Association is asking the Illinois Supreme Court to order all Illinois county tax collectors to place in a separate account all money received by them from the payment of personal property taxes for 1971 by individual taxpayers in Illinois.

The class action suit was filed by the state-wide Farm Bureau and Raymond Larson, a DeKalb County farmer, in Springfield on Monday. Purpose of the action is to make sure there will be money available in the treasury of each county to make a refund to taxpayers if the United States Supreme Court rules that the 1970 referendum authorizing a personal property tax on individuals is unconstitutional, and that the result of that ruling is to entitle every individual taxpayer who paid his 1971 personal property tax to a refund.

By filing this petition in the Illinois Supreme Court, the IAA hopes to persuade that Court to extend to every individual personal property taxpayer in every county similar protection to the circuit court in Cook County, the opinion of Edward V. Hanrahan, Cook County attorney, already has given to some individual personal property taxpayers in Cook County, according to Gordon C. Adler, IAA general counsel.

Under that Cook County ruling, a separate refund account has been authorized for those taxpayers "who own personal property used for their personal enjoyment."

That separate refund account,

however, would not benefit those who hold personal property tax for the purpose of earning an income from it such as farmers. The IAA petition seeks to establish a separate refund account for all individual taxpayers in Illinois.

The U. S. Supreme Court has agreed to hear the petition filed by the 1970 referendum and is arguing that the Illinois Supreme Court erred in deciding that the 1970 referendum ending the personal property tax on individuals violated the U. S. Constitution.

The State Court held that corporations thereby were denied equal protection under the 14th Amendment. Illinois voters in 1970 decided by a 7 to 1 margin that the tax on individuals should be abolished.

## Chevelle and Impala. We've packed them for your vacation.

There are certain things no family should start out on vacation without.

Things that will help make your trip more enjoyable, less worrisome. We've packed many such things into our Chevelles and Impalas, the two most popular cars in their fields.

Chevelle: the most popular intermediate.

Impala: the most popular full-size car.

### "Talking" seat belts.

Traveling around, getting in and out of the car a lot, it's easy to forget about buckling up.

Consequently, every new Impala and Chevelle has a front seat belt reminder system that speaks up if you try to start out before buckling.

A buzzer buzzes and light flashes to make sure you get the message.

And that's just one of many protective features now being built into these cars.

### I feel their muscles.

On the road, it's reassuring to realize you're riding in a car that's well built.

What you get with an Impala or Chevelle is a body that's an all-

plenty of room.

So at all four wheels we've put big coil springs to gentle up your ride.

And between the body and the frame we've placed a network of little rubber cushions to help keep things quiet inside.

### There's even more.

Here are a few items you'll be taking along this summer if you're in a new Impala or Chevelle:

A tough acrylic lacquer finish.

A battery with its terminals on the side so corrosion can't build up.

An engine that operates efficiently on no-lead, low-lead, or regular fuel.

Why, on Impala, you even get power steering, power disc brakes and Turbo Hydra-matic transmission—all standard.

### A beautiful choice.

We suggest you stop by your Chevrolet dealer's soon, to take a close look at the 1972 Chevelle or Impala.

It's nice to know that whichever way you go, you'll be getting a whole lot of car.

Packed with the right features.

Packed with good old American value. Have a good trip.

## Rutherford Backs Walker, Howlett in Campaign

By NANCY DAY  
Copy News Service

Springfield — Prominent Peoria Republican William Rutherford, supporting Democrats Dan Walker and Mike Howlett this year.

He's also backing Bill Scott and Hudson Sours of his own party.

To let his support be known, Rutherford has erected a large billboard in the yard of a house he owns in Peoria Heights reading:

"Support the Man . . . Not the Party!" and listing Walker and Howlett, Scott for attorney general, Howlett for secretary of state and Sours for state senator.

Rutherford said the sign was used as primary headquarters for Peoria physician John Mathis. Dr. Mathis opposed Gov. Richard Ogilvie in the primary, and despite little campaigning and slight name recognition garnered a significant slice of the GOP vote.

Rutherford, as usual, voted in the Republican primary—for Mathis, who was a ticket-splitter down November 7.

**Change is Crucial**

He emphasized that there is no personality conflict involved, but he does say he "disagreed with him [Ogilvie] . . . I'm disappointed with the Ogilvie administration," that a change is crucial.

"It's a matter of vastly dif-

ferent philosophies," Rutherford said in an interview. "The state's needs are so dramatically desperate the public has to make a choice."

Rutherford served on the old Public Aid Commission with both Walker and Howlett and although they often disagreed with him, he said both were "always straightforward and absolutely truthful."

He campaigned for Ogilvie in 1970, but as the administration's first Conservation Department director. An ardent fan of the patronage system, Rutherford came under heavy criticism from environmental regulars who were eventually booted upstairs by Ogilvie to be "an environmental coordinator."

**Mank Speaking Engagements**

He left that post after just a couple of months, and has since devoted his time to his law practice and to frequent travel (more than 30 in two years) speaking engagements on environmental issues.

In all these appearances, he has had an unknown word for Ogilvie.

But he said when the credibility of public officials is at an all-time low, something must be done immediately to free government services from the abuse of patronage.

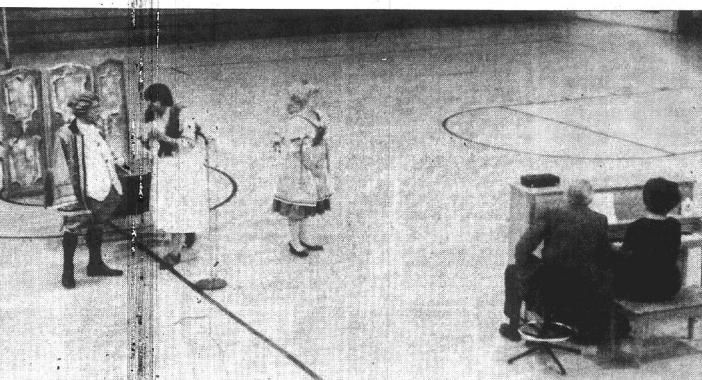

"It's time for a housecleaning," Rutherford said, adding that Walker is the man to attack "patronage corruption."

But Rutherford doesn't want the house cleaned of Howlett, Sours and Scott, for they are doing a competent job in his eyes.

He is a very conservative Republican. He said, "I'm conservative for a Democrat, the state and Scott a moderate. But Rutherford thinks '72 is the year for the man of integrity who speaks his mind and keeps his word, whatever labels happen to be attached to his name."

### Students Denied Monetary Awards Urged to Appeal

Southern Illinois University-Southeastern students currently holding monetary awards from the Illinois State Scholarship Commission who have been denied awards for the coming year are being urged to apply again.

Elwood Buchanan, a counselor in the student work and financial assistance office, said "a significant number" of students

receiving the fall \$375 award for the present academic year have had their requests denied completely or reduced for the 1972-73 academic year, beginning in September.

Buchanan said the denials and reductions have occurred

despite the fact that there has been no apparent change in the student's financial need. The full award covers in-state tuition at SIU

SW for three academic quarters. Buchanan said 1,734 SIU-SW students hold Illinois State Scholarship Commission awards this year.

"I'm suggesting to students who think their applications were held unfairly denied that they appeal in writing to the commission as soon as possible," Buchanan said. "A carbon copy should be kept by the student for his records.

The review board of the commission is supposed to meet sometime in June or before

Buchanan said students having questions about the monetary awards should see him at the student work and financial assistance office on the main campus or call him at 692-2880.

## Christian Movement to Climax with 'Key 73'

The greatest movement of Christian outreach in the history of North America will climax in 1973, leaders of more than 100 denominations have reported.

It is "Key 73" a "continental call to Christ" that is destined to touch every American home, either with action of local churches, Bible distribution or by radio, television and daily and weekly newspapers.

Lutheran, Southern Baptist, Assemblies of God, United Methodists and 90 other churches have embraced this "mass call to Christian witness and involvement."

The overall theme of the program will be implemented in six phases: "Calling On, Conviction, "To Repentance and Prayer," "To the Word of God," "To the Resurrection," "New Life," "To the Proclamation of Good News."

"Key 73" is no bureaucratic program," the executive director of the "Key 73" Central Committee, Dr. Theodore Raedeke of St. Louis, a Lutheran church Missouri Synod church man, said.

Raedeke added: "This massive evangelism program will be focused on local church activities and will not be dominated by any denomination."

"It's a 'Togetherness'."

"For the first time nations of Christians are working together who have never worked on programs with other Christians before," Raedeke said.

The "Key 73" leader said baptismal bonds, posters, Bible study, prayer groupings, prayer call participants, Bible broadcasts, Easter and Christmas programs will unfold the story of "Key 73" this year and next.

Another church leader, Dr. Joseph H. Yeakel, general secretary of the United Methodist Church's board of evangelism in Nashville said:

"Key 73" is concerned with making every person in North America aware of God's love, and this can happen only through the interest and cooperation of North American Christians who will involve themselves in their own particular form of evangelism now during this year.

How did it all begin? It was in late 1971 when representatives of more than 100 denominations gathered in St. Louis. After two hours of debate "Key 73" was launched.

Face Social Issues

Some churches may choose to distribute Bibles, some will hold Christian witness missions and preaching evangelism to carry out their mission in "Key 73."

Other talented laity will be writing, painting, delivering Bibles and creatively facing social issues as their part of the great evangelical program.

"Key 73" will cut across racial, cultural and social lines.

Area residents are being urged to ask their pastor, elder or deacon what they can do to help them in "Key 73."

"Key 73" is a simple assurance that "Jesus Christ is the same yesterday, today and forever." The program has been planned to supplement the efforts of Christian churches and organizations as they strive to be effective centers of redemption and more aggressive witnesses to God's redeeming power in His world.

### Ainad Shrine to Host Ceremonial

Ainad Temple, Ancient Arabic Order Nobles of the Mystic Shrine, whose mosque is located at East St. Louis, will be host to one of the largest spring ceremonials in many years, Saturday, May 13, starting at 8 a.m.

One class has been named the

"Harvey G. Baker Sr. Class" in

honor of the late Potentate.

Baker served as Potentate in 1933, and this is

this is only one of many events

Ainad is planning for the year.

## 50,000 Drivers Fail

Last year alone, over 50,000 Illinois licensed drivers failed the state written examination. This year the number of drivers that will fail could jump to a hundred thousand or more. Experts say, "One reason is, that rules and regulations change, and even some good safe drivers just don't keep up with the new laws." If you are one of the drivers you may be among the hundreds of thousands that will be re-examined in 1972. So if you're nervous about taking

## 'Quick Return' Policy Has Cut Alton State Hospital Patients from 2,316 in '60 to 478

The resident population at Alton State Hospital has dropped from 671 residents last year at this time to 478 patients, according to Dr. Albert J. Glass, director of the Illinois Department of Mental Health.

The average count during 1969 was 2,316 patients.

Alton State Hospital, which opened its doors July 15, 1917, is representative of Gov. Richard B. Ogilvie's health program to develop "the very best treatment facilities for quick return to normal, everyday community living," Dr. Glass said.

"We're getting out of the hotel business," he said.

"Patients will no longer come to the hospital just because they have no families or homes."

The Illinois Department of Mental Health continues to discharge more patients every year than it admits, the director said.

In 1969, there were a total of 28,646 mentally ill adults discharged, with 26,864 admitted.

Five years ago, the number of discharges was the same as the number of admissions.

Over the last five years, there has been 37% reduction in the number of adult patients.

Dr. Glass said,

"Over the same time, he explained, there has been an increase of 72% in employees.

He added that this increase in patient service employees significantly has increased most patient-to-employee ratios on an almost one-to-one basis.

Another important aid in reducing patient admissions throughout the state has been the comparatively new geriatrics transfer program, Dr. Glass said.

An intensive effort has been made to place elderly patients who are not mentally ill back into the community.

As they move out, the employees who cared for them are free to work closely with the mentally ill.

In fiscal 1971, there were about 300 mentally ill children and 45 adolescents at any one time in state psychiatric facilities.

Dr. Glass said, adding that the state's goal has been to send such children as soon as possible back to families, friends and schools in each community.

### Vital Statistics List 87 Births, 31 Deaths

Thirty-one persons died in the Quad-Cities during April, the lowest number for any one month this year, according to a vital statistics report by Robert W. Stevens, clerk of Granite City.

The report also listed 87 births here last month, more than the 74 in March, but less than the 96 births reported in April 1971.

The number of deaths last month is the lowest since November 1971, when 27 persons died here. The number rose to 34 in December, while 35 deaths were reported each in January and February of this year, in March, 32 persons died, the report showed.

No fetal deaths were reported last month, but the total for the first four months of the year remains at four. Deaths in the four-month period total 137, while 345 births have been reported thus far in 1972. At the end of April 1971, 389 births, 157 live births and four fetal deaths had been recorded.

## Less Financial Aid Seen for SIU Students

New federal guidelines concerning the dependency status of college students could mean a reduction in financial aid beginning next fall for some students of Southern Illinois University-Carbondale.

The federally assisted programs at SIU which could be affected are educational opportunity grants, law enforcement educational loans, national defense loans, and the federally financed portion of the student work program.

Charles E. Gray, assistant to the director of SIU Student Work and Financial Assistance, said the U.S. Office of Education now will require that students who claim to be independent of their parents must submit certain proofs of that fact, qualifying the four types of federal aid.

Gray said it is possible that many students who now consider themselves independent may be reclassified as dependent under the new regulations.

At present there are about 2,800 students at SIU-Carbondale who are listed as independent and who have filed ACT financial need analysis forms. The new regulations require the student can qualify for federally assisted financial aid programs.

## Latin Conference Set In June at U. of I.

Classical Greek and Roman civilization is the subject of a week-long symposium which will be conducted by the Department of the Classics of the University of Illinois.

The seventh annual High School Latin Conference will be held June 19-24 at the U. of I. Urbana-Champaign campus.

Illinois high school students who have completed two years of Latin in the classroom and who are recommended by the Latin teachers are eligible.

Along with acquiring participants with classical civilizations as they are presented at the college level, the conference offers techniques for learning Latin and Greek and a preview of life on campus.

The program includes workshops in the dramatic reading of Latin literature and the production of Roman comedy, discussions of Mediterranean archaeology, the Dead Sea Scrolls, and a tour of the University of Illinois' Classical Culture at the U. of I.

Studies will be conducted in the sounds and symbols of ancient Greek, and the historical, scientific, and the historical, philosophical and psychological backgrounds of mythology.

**AIR POLLUTION STUDY.** Vernon Shanks, center, of Granite City, will be working this summer with scientists from throughout the country studying possible connections between air pollution and increased rainfall in the St. Louis area. Shanks, a junior at Southern Illinois University-Southwestern majoring in sanitation technology, was chosen by the SIU-SW Science and Technology-Division and the student work and financial assistance office. Discussing the summer project with him are Laurence McAneny, left, dean of the Science and Technology Division, and Ramon Williamson, right, SIU-SW vice-president for student affairs.

## Four Students to Aid In Air Pollution Study

Four students from Southern Illinois University-Southwestern will be assisting in research studying possible connections between air pollution and increased rainfall in the St. Louis metropolitan area.

The students, who will be working this summer with scientists from throughout the country, were selected by the SIU-SW student work and financial assistance office and the Science and Technology Division.

Chosen to participate in the project between July 5 and Aug. 5 were Vernon Shanks of Granite City, a junior studying sanitation technology; Byron Prince of East St. Louis, a senior majoring in business; William Gregory Jr. of East St. Louis, a junior majoring in geophysics; and Doug Douthit of Collinsville, a freshman in the Chemistry Division.

All four will be assisting in releasing tracers into thunderstorms. The students will clean tracers and collect rain samples, which will be checked for pollution agents.

The projected five-year study, in its second year, involves the Illinois State Water Survey, the University of Illinois, Chicago, the University of Wyoming, Lawrence National Laboratories, Battelle Laboratories and others.

Preliminary studies have indicated air pollution from automobile exhaust is increasing the amount of rain in urban areas, especially on weekdays when vehicular traffic and industrial production are at their peaks.

GERALD RUNKLE  
Dean Runkle Writes Book on Anarchism

The essence of anarchism is individual liberty, Gerald Runkle says in the opening sentence of his new book, *Anarchism: Old and New*, just released by Dell Publishing Co.

Dean of the Humanities Division at Southern Illinois University, Southwestern, Runkle writes, "The desire that an individual favors a society in which the lives of its members are directly controlled by their own decisions, to that degree does he espouse anarchism."

The anarchist, Runkle proclaims, accepts no master, recognizes no sovereign."

In the first part of his book, which has been released in both hard and soft paperbacks, Runkle deal with the "old" anarchism, those ideas expressed by men and movements in the 19th century, the heyday of anarchism.

Part two deals with the "new" anarchism, the student left, the radical right and existentialists, which the author calls quasi-anarchists.

"Despite the fact that virtually everyone who has written on the subject has pointed out that anarchism is not equivalent to chaos and nihilism, the popular belief persists that anarchists attack the social order because they prefer disorder," Runkle writes in his book.

"The earliest anarchism, however, opposed government because they preferred a different kind of order."

"Order is not good in itself, when liberty is absent or when it cancels basic tensions and animosities within society," Runkle says. "Anarchists are revolutionaries and they prize disorder in itself, are willing to subject society to it in order to bring about a higher order of harmony."

## Tom Scott Knows What Horns Are All About

By JUDY HUGG  
Copley News Service

The name of Tom Scott may not ring a bell for the average music listener. But for anyone who is into jazz or rhythm and blues, his name rings a bell of delight just as his new A&M

"Great Scott" is an excellent effort from a man who knows what horns are all about. Scott reaches way down into his soft jazz roots to come up with some sweet hot jazz. He utilizes a variety of instruments to bring home the musical mood in each song.

The instruments that Scott uses include the flute, bassoon, clarinet and baritone, tenor and E-flat soprano sax. A variety of good brass as well as some fine piano and bass work back up Scott.

Tom's first effort, the moody, mellow and pleasantly clear, His efforts with Jon Mitchell's "Woodstock" make it a mystical, memorable "Visions of Highways." It's a lesson and a study, so you may find yourself mesmerized and staring out the window after listening to "Val-

However, even though he's a master on the flute, Scott doesn't let the sax be outdone by the flute on this album. "Boss Walk" brings brassy sax noise strutting into your ears and my favorite, "Dahomey Walk," is a hot blues jazz song heavy on sax and blues piano — mighty fine.

Weak Spot

A weak spot in "Mantra" does little to detract from an otherwise solid album. It's probably a bit too much for the average jazz fan, but jazz and many R&B fans will appreciate "Great Scott," and he has a few more fans from his effort on this LP.

## Seams Revive an Old Grooming Question

"Are my seams straight?" Any woman over 30 can remember the pearly stockings era when the question was the final check on grooming.

Now, younger women are about to learn the importance of keeping a slender seam on a straight course up the back of the leg.

New hose not only have back seams, they have seams made more interesting.

The deepest contrast is in navy hose with red seams. The accent is softened only slightly in sheer pastel hose with seams in a deeper tone of the same shade.

It's still possible to keep legs fashionable though seamless.

Pale shades, ranging from beige to white sand, are introduced as the season's popular neutrals. They are in harmony with the lighter feeling in clothes for spring and summer.

New patterned hose make the most of the pale look by putting bold designs against light backgrounds.

Brown on light beige, charcoal on white and dark green on olive are some of the combinations.

Among the most interesting is the pattern inspired by the season's oriental theme. The hose are side-striped with the ideograph for "Good Luck."

### Alcohol Aid to Ailing Heart? Data Disagrees

By IRWIN J. POLK, M.D., Coplay News Service

A little alcohol is good, especially for older folks. It stimulates the heart.

That is a fact generally accepted by the public and the medical profession alike. A little alcohol stimulates the heart. Right?

Wrong! According to a former study that appeared recently in the Journal of the American Medical Association, a little alcohol is not a stimulant for the heart and therefore not good for it.

On the contrary, it appears that a little alcohol can in fact be harmful to the heart, especially for people with heart trouble.

The old notion that alcohol was a heart stimulant was based mostly on the observation that people who have been drinking seem generally to be flushed in the face.

The picture of the blusher as the favorite is too well known to everyone. The feeling of warmth that goes with a few drinks is also familiar.

Too, doctors have known that flushed, warm skin comes from increased circulation to the heart. The conclusion is inescapable;

even in small amount, alcohol impairs the work of the heart.

What about the healthy? Included in this study were patients with healthy hearts.

In these patients, there is evidence of some increase in the effective work of the heart.

Four healthy patients, even, alcohol may stimulate the heart; but it does the opposite for people with heart trouble.

This is the most recent work reported about alcohol and the heart. Lately, there have been other reports which indicated the same: alcohol may be a mild stimulant for the heart, but it is a depressant for the sick heart.

There is some good evidence that constant use of alcohol impairs the ability of the heart muscle to contract.

However, then does the patient who has been drinking develop the flush which was thought to be a sign of increased circulation?

The old notion that alcohol was a heart stimulant was based mostly on the observation that people who have been drinking seem generally to be flushed in the face.

The picture of the blusher as the favorite is too well known to everyone. The feeling of warmth that goes with a few drinks is also familiar.

Too, doctors have known that flushed, warm skin comes from increased circulation to the heart.

The conclusion is inescapable;

it does this by opening the blood vessels in the skin to cause a flush. But at the same time, the blood vessels in the muscles under the skin constrict.

The result of the combination of dilated skin blood vessels and contracted vessels in the muscles is an overall decrease in circulation to the heart.

So while the patient might appear and feel flushed, it is really getting less blood, overall, to the skin and muscles.

If he also has heart disease, the work of his heart is to do is markedly reduced.
